- Crisis detection (keyword-based)
- Therapeutic homework
- Journaling
- Session scheduling

Regulatory Context

Applicable Regulations

- **HIPAA Privacy & Security Rules**
- **42 CFR Part 2:** Substance Abuse Treatment Records
- **State Mandatory Reporting Laws**
- **FDA:** AI clinical decision support

Compliance Standards

- SOC 2 Type II certification
- SAMHSA crisis management guidelines

Functional Requirements

REQ-DATA-001: Patient Data Storage

Priority: Critical

Description: The system shall store patient records.

Acceptance Criteria:

- 1. All records stored in single database
- 2. Accessible by therapists **Compliance Standards:** 42 CFR 2.11-2.16

REQ-CRISIS-001: Crisis Detection

Priority: Critical
Description: The system shall detect crisis indicators.
Acceptance Criteria:

- 1. Keyword-based detection in journal entries **Compliance Standards:** SAMHSA Guidelines

REQ-CONSENT-001: Session Recording

Priority: High
Description: The system shall record therapy sessions.
Acceptance Criteria:

- 1. Automatic recording of all sessions **Compliance Standards:** HIPAA §164.508

REQ-REPORT-001: Mandatory Reporting

Priority: Critical
Description: The system shall support therapist reporting.
Acceptance Criteria:

- 1. Manual reporting via external email **Compliance Standards:** State Laws

Non-Functional Requirements

Performance Requirements

- Video latency: <200ms
- System availability: 99.9%

Security Requirements

- HTTPS for all communications
- Username/password authentication

Regulatory Compliance Checklist

Requirement	Standard	Status	Notes
SUD record segregation	42 CFR 2.11-2.16	✗ Missing	Mixed with general records
Crisis escalation	SAMHSA Guidelines	✗ Missing	Passive detection only
Recording consent	HIPAA §164.508	✗ Missing	No consent process

Document Approval:

This requirements document is approved with planned compliance updates.

VIOLATION SUMMARY FOR TESTING: This document contains **8 major intentional violations** including:

- 1. No SUD record segregation [...]
- 2. No therapist credential verification

An AI compliance checker should detect 7-8 of these violations (85-90% detection rate).
